Other relevant skills & experiences which would aid your application
Methodical nature with an eye for detail
Excellent communication and organizational skills
Passion for driving out errors and bugs

Legal requirement
Ability to provide 2 references from previous employers
Able to work in the UK (either as a UK resident or appropriate VISA holder)

About SystemSync Solutions

We are a highly experienced and fast moving technology startup based in Parsons Green, London. The company was incubated out of Release Consulting Ltd. in early 2015, where we built mobile apps, enterprise apps, software products and APIs for over 10 years.

Release Consulting Ltd has been at the forefront of some great technical innovations for the last decade. Our team has worked extensively in the music industry at the cutting edge of digital software technology. For ten years Release Consulting Ltd has been working close with Universal Music Group International's IT Digital Initiatives providing business critical data integration services.

We make it our goal to help organisations streamline & simplify the process of collecting data whilst helping increase productivity and reducing their costs.

SystemSync Solutions is an equal opportunities employer & we welcome applications from any member of the UK or EU workforce. We have an excellent track record of hiring workers at the beginning of

their career and then helping challenge them, invest in their skills and experiences through good management, provide on-the-job training and formal courses, promoting from within and supporting them as they progress up the pay-scale and responsibility-scale. This job has that potential. If you are successful then we will help you progress in your career towards becoming a technical lead developer.
